Cara Sinkronisasi Domain dengan Command Line di Multiserver Directadmin

Tutorial berikut adalah cara bagaimana mensinkronkan sebuah domain ke server multiserver dns melalui shell command line linux

```
echo 'action=rewrite&value=named&domain=domain.com' >>  
/usr/local/directadmin/data/task.queue  
/usr/local/directadmin/dataskq d80
```

this namespace doesn't exist: directadmin:dns -textPages
