# Panduan Directadmin Reseller Level

Berikut ini adalah panduan control panel directadmin reseller level oleh pusathosting.com. Pada reseller level ini pembahasan akan berfokus

- Membuat dan Merubah Paket Hosting
- Menambah dan Menghapus User / Pelanggan hosting
- Menentukan nameserver
- Backup data pelanggan hosting

dan berikut ini adalah tampilan dari directadmin reseller level.

The screenshot shows the DirectAdmin Reseller Level control panel. The interface is divided into several sections:

- Header:** The "DirectAdmin" logo is on the left, and a "Message System" notification with 14 messages is on the right.
- Navigation Bar:** Contains icons for Home, Webmail, Password, Help, Files, and Logout.
- Search:** A search bar with the text "contains" and buttons for "Domain" and "User".
- Account Management:** Includes links for "Add New User", "List Users", "Manage Tickets", "Add Package", "Manage User Packages", and "Edit User Message".
- Reseller Tools:** Includes links for "Change Passwords", "Reseller Statistics", "IP Management", "Skin Manager", and "Manage User Backups".
- Extra Features:** Includes links for "System Info", "Nameservers", "Message All Users", and "Contact Administrator".
- Right Sidebar:** Contains "Access Level" (Admin Level, Reseller Level, User Level) and "Your Account" table.

|                 | Used   | Max       |
|-----------------|--------|-----------|
| Disk Space (MB) | 509.85 | unlimited |
| Bandwidth (GB)  | 0.0350 | unlimited |
| E-Mails         | 3      | unlimited |
| Ftp Accounts    | 2      | unlimited |
| Databases       | 1      | unlimited |
| Domains         | 1      | unlimited |
| Users           | 1      |           |

## Add Package

**Add Package** atau menambah paket fungsinya pada menu ini anda dapat membuat paket shared hosting untuk pelanggan anda.

Misalnya seperti paket hosting yang anda temukan disini

<https://pusathosting.com/standard-hosting-murah>

Contoh :

1. Space : 350MB
2. Bandwidth : unlimited
3. Email : 10 alamat

semua bisa anda definisikan melalui add package, coba perhatikan gambar dibawah ini.

| DNS Control            | <input checked="" type="checkbox"/> |                                               |
| Suspend At Limit       | <input checked="" type="checkbox"/> |                                               |
| Skin                   | enhanced                            |                                               |
| Language               | en                                  |                                               |

Package Name: newpackage **Nama paket** Save Cancel

**Access Level**

Admin Level  
» Reseller Level  
User Level

**Your Account**

|                 | Used   | Max       |
|-----------------|--------|-----------|
| Disk Space (MB) | 509.85 | unlimited |
| Bandwidth (GB)  | 0.0350 | unlimited |
| E-Mails         | 3      | unlimited |
| Ftp Accounts    | 2      | unlimited |
| Databases       | 1      | unlimited |
| Domains         | 1      | unlimited |
| Users           | 1      |           |

Beberapa hal penting antara lain :

1. **System Info** - artinya pelanggan hosting anda akan dapat melihat spesifikasi server anda.

2. **Suspend at limit** - ini artinya apabila akun pelanggan atau user anda nantinya melebihi paket yang sudah anda tentukan maka akun akan otomatis tersuspend

## Manage User Packages

Menu manage user packages berfungsi untuk mengelola paket hosting yang telah anda ciptakan sebelumnya. Perhatikan gambar berikut ini

The screenshot shows the DirectAdmin interface. At the top, there's a navigation bar with icons for Home, Webmail, Password, Help, Files, and Logout. The main content area is titled 'Manage User Packages' and features a table with columns: Package, Bandwidth, Disk Usage, and Select. The first row shows a package named 'default' with 'unlimited' bandwidth and '1000' disk usage. A red circle highlights the 'Package' column header with the text 'klik nama paket untuk merubah spek'. To the right of the table is a 'Delete Selected' button. The right sidebar shows the 'Access Level' (Admin Level, Reseller Level, User Level) and 'Your Account' details (Disk Space, Bandwidth, E-Mails, Ftp Accounts, Databases, Domains, Users).

| Package | Bandwidth | Disk Usage | Select                   |
|---------|-----------|------------|--------------------------|
| default | unlimited | 1000       | <input type="checkbox"/> |

Advanced Search

Delete Selected

Untuk merubah paket anda cukup klik pada nama paketnya sedangkan untuk menghapus paket anda bisa lakukan dengan klik dibagian sebelah kanan nama paket dan klik delete.

## Add New User

Menu **Add New User** berfungsi untuk menambah user baru dan agar bisa menambah user baru anda harus membuat paket hosting ( add new package ) seperti panduan diatas.

**DirectAdmin**

## Manage User Backups

Menu **Manage User Backups** berfungsi untuk mengatur backup semua akun user atau pelanggan hosting anda dan pula me-restore data backup.

### Create Backups

Membuat backup terdapat pada bagian atas yaitu opsi **Create Backup** perhatikan gambar berikut ini

The screenshot shows the DirectAdmin interface for creating backups. The title bar includes the DirectAdmin logo and navigation icons for Home, Webmail, Password, Help, Files, and Logout. The main content area is titled 'Create Backup' and is divided into four steps:

- Step 1: Who**: A red circle highlights the 'All Users' radio button. Below it is a table with columns 'user' and 'Select'.
- Step 2: When**: A red circle highlights the 'Cron Schedule' radio button. Below it are fields for scheduling: Minute (0-59), Hour (0-23), Day of Month (\*-31), Month (\*-12), and Day of Week (\*-0-7).
- Step 3: Where**: A red circle highlights the 'Ftp' radio button. Below it are fields for FTP settings: Local (selected), user\_backups/, IP, Username, Password, Remote Path (/), Port (21), and Secure FTP (No).
- Step 4: Submit**: A 'Submit' button is located at the bottom right.

At the bottom left, a checkbox labeled 'Skip Suspended' is highlighted with a red circle. The watermark 'PusatHosting.Com' is visible across the bottom of the interface.

Anda juga bisa membuat backup dengan otomatis mengirimkan file backup melalui FTP.

### Restore Backups

Pada bagian Restore backups anda bisa mengembalikan data user dari data backup yang anda miliki.

Perhatikan gambar.

**Restore Backup****Step 1: From Where**

☒ Local:   
☐ Ftp:  
IP:   
Username:   
Password:   
Remote Path:   
Port: 21  
Secure FTP: No

**Step 2: Select IP**

☒ Use the IP stored in the backup  
☐ Use the IP from the list:

\* Note that you must set the IP to be shared if you want to add multiple users to it. If you select a non-shared IP, you can only restore 1 user to it.

**Step 3: Select File(s)**

Location: /home/username/user\_backups

| File            | Select                              |
|-----------------|-------------------------------------|
| username.tar.gz | <input checked="" type="checkbox"/> |

Step 4: **PusatHosting.Com**
