Mengaktifkan SSL Untuk Subdomain 1

Mengaktifkan SSL Untuk Subdomain

Bagaimana cara mengaktifkan ssl letsencrypt untuk subdomain di directadmin? adapun tutorialnya adalah sebagai berikut :

1. Klik **SSL Certificate**

Account Manager

2. Klik tab sebelah kiri sendiri **Free & automatic certificate from Let's Encrypt**

Please enter your search criteria

Dashboard / SSL Certificates

SSL Certificates

<input checked="" type="radio"/> Free & automatic certificate from Let's Encrypt	<input type="radio"/> Paste a pre-generated certificate and key	<input type="radio"/> Create A Certificate Request
--	---	--

Common Name

Key Size (bits)

3. Klik centang **Wildcard** disebelah kanan

<input checked="" type="radio"/> Use the server's certificate	<input type="radio"/> Create your own self signed certificate
---	---

☒ Wildcard

4. Klik **SAVE** warna hijau dibawah

Setelah klik SAVE tunggu prosesnya sekitar 15 menit kemudian test akses website anda dengan https
