Directadmin symLink (http) public_html dan (https) private_html	1
--	----------

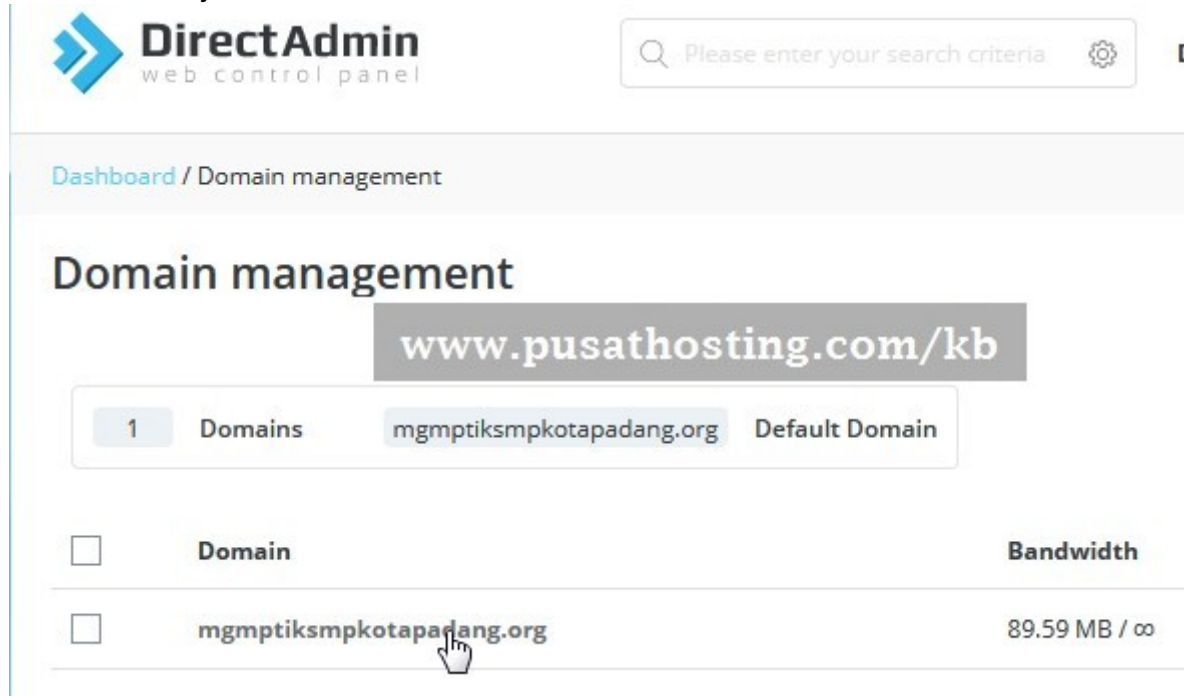

Directadmin symLink (http) public_html dan (https) private_html

Isi website di directadmin antara http dan https mengapa berbeda? solusinya adalah melakukan setting symlink di domain setup. Adapun tahapannya adalah sebagai berikut :

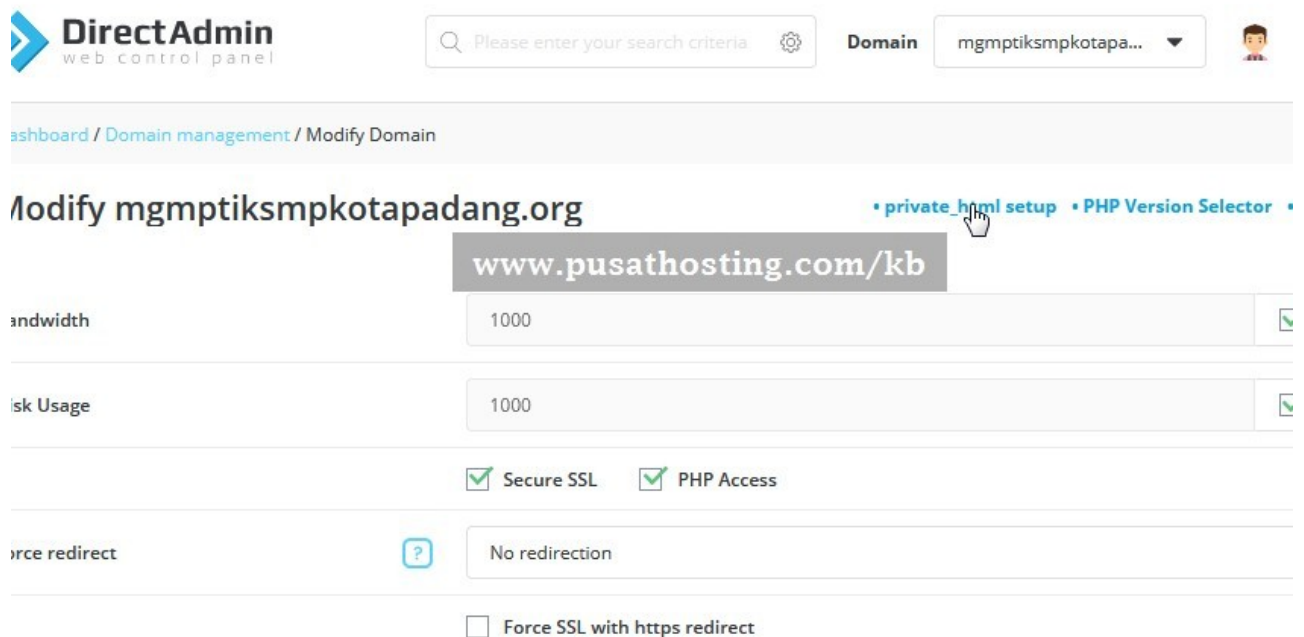

1. Klik domain setup

2. Klik nama domainnya

3. Klik kanan atas private_html

DirectAdmin web control panel

Search: Please enter your search criteria

Domain: mgmptiksmpkotapa...

Dashboard / Domain management / Modify Domain

Modify mgmptiksmpkotapadang.org

[private_html setup](#) [PHP Version Selector](#)

[www.pusathosting.com/kb](#)

Bandwidth: 1000

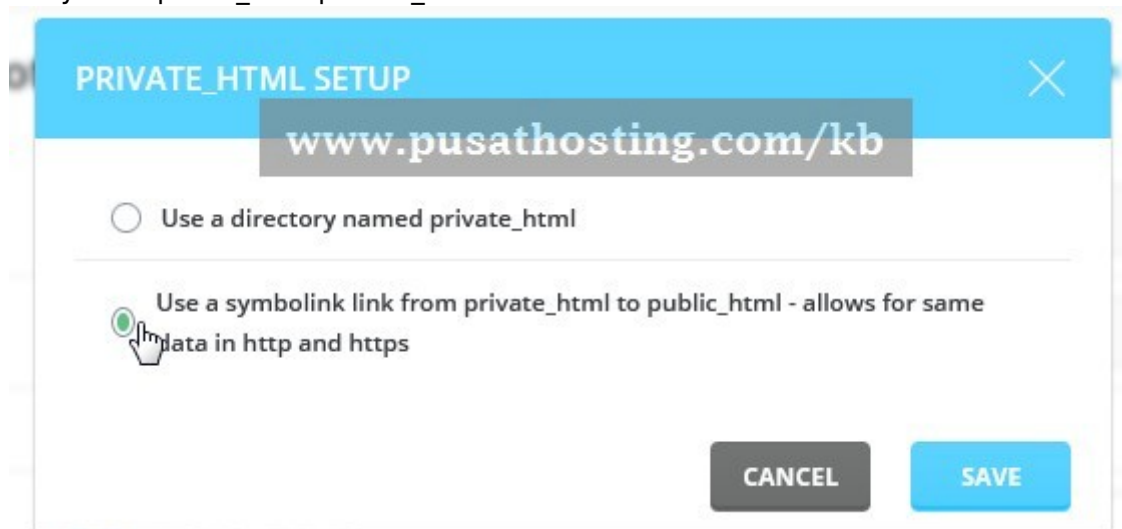

Disk Usage: 1000

☒ Secure SSL ☒ PHP Access

Force redirect: ☐ No redirection

☐ Force SSL with https redirect

4. Klik pilih symlink public_html private_html

PRIVATE_HTML SETUP

[www.pusathosting.com/kb](#)

☐ Use a directory named private_html

☒ Use a symlink link from private_html to public_html - allows for same data in http and https

Selesai, selamat mencoba.
