Directadmin symLink (http) public_html dan (https) private_html

Isi website di directadmin antara http dan https mengapa berbeda? solusinya adalah melakukan setting symlink di domain setup. Adapun tahapannya adalah sebagai berikut :

Klik domain setup

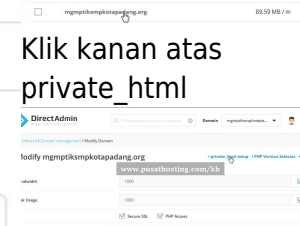

The screenshot shows the DirectAdmin web control panel. Under the 'Account Manager' section, the 'Domain Setup' button is highlighted with a mouse cursor. Other visible buttons include 'Subdomain Management', 'DNS Management', and 'SSL Certificates'. The URL bar shows 'www.pusathosting.com/kb'.

Klik nama domainnya

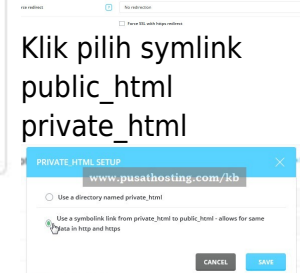

The screenshot shows the 'Domain management' section. A table lists domains, with 'www.pusathosting.com/kb' selected. The table has columns for 'Domain' and 'Bandwidth'.

Klik kanan atas private_html

The screenshot shows the 'Domain management' section. The 'private_html' option is selected in the 'Domain' column.

Klik pilih symlink public_html private_html

The screenshot shows the 'PRIVATE HTML SETUP' dialog box. It has two radio buttons: 'Use a directory named private_html' (selected) and 'Use a symbolic link from private_html to public_html - allows for same data in http and https'. The 'SAVE' button is visible.

Selesai, selamat mencoba.
