# Softaculous: Solusi Installation Already Exists

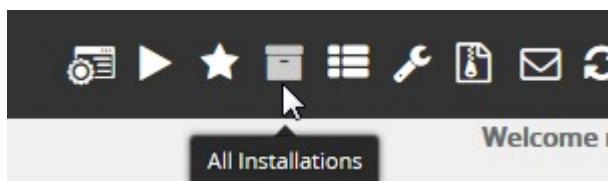

Ketika menginstall software melalui softaculous dan anda menemukan error "Installation already exists <http://domainanda.com> as per our records. To re-install the application please uninstall the existing installation" maka berikut ini adalah penyebab dan solusinya.

## Ilustrasi Gambar

The screenshot shows the Softaculous interface for installing OpenCart 1.5. At the top, it displays the software logo, name, version (2.0.1.1, 1.5.6.4), release date (23-04-2014), and a 'Changelog' button. Below this is a navigation bar with tabs: Install (which is selected and highlighted in blue), Overview, Features, Screenshots, Demo, Ratings, Reviews, and Import. A large orange rounded rectangle highlights a red box containing an error message: "The following errors were found: An installation already exists at http://nurajaya.com as per our records. To re-install the application please uninstall the existing installation". Below the error message, there's a section titled "Software Setup" with fields for choosing the version (1.5.6.4), protocol (http://), and domain (nurajaya.com).

## Penyebab

Anda telah menginstall script yang sama sebelumnya cara mengetahuinya dengan klik pada icon bergambar kardus, perhatikan ilustrasi dibawah ini
