Test Kecepatan Website dengan Curl 1

Test Kecepatan Website dengan Curl

Berikut ini cara menghitung kecepatan load website dengan curl

Pertama buat

```
nano curl-format.txt
```

dan isi dengan

```
  time_namelookup:  %{time_namelookup}s\n
       time_connect:  %{time_connect}s\n
    time_appconnect:  %{time_appconnect}s\n
   time_pretransfer:  %{time_pretransfer}s\n
      time_redirect:  %{time_redirect}s\n
 time_starttransfer:  %{time_starttransfer}s\n
                    ----------\n
         time_total:  %{time_total}s\n
```

kemudian jalankan

```
curl -w "@curl-format.txt" -o /dev/null -s "http://wordpress.com/"
```

demikian
